Event Detection Report

Object	Cup	**Analysis Date**	17 Oct 2026
Video	cup video.mp4	**Model Output**	Rule-based cup movement detection (Stage 1)
Total Events	7	**Video Duration**	00:00:15.27

1. Detected Events

#	Start Time	End Time	Duration (s)	Event Type	Detection method	Description
1	00:00:01.18	00:00:01.78	0.60	Cup Moving	Rule-based	The tracked cup changed position during this interval. This does not establish whether it was lifted or placed.
2	00:00:03.60	00:00:04.30	0.70	Cup Moving	Rule-based	The tracked cup changed position during this interval. This does not establish whether it was lifted or placed.
3	00:00:04.65	00:00:05.90	1.25	Cup Moving	Rule-based	The tracked cup changed position during this interval. This does not establish whether it was lifted or placed.
4	00:00:06.97	00:00:07.74	0.77	Cup Moving	Rule-based	The tracked cup changed position during this interval. This does not establish whether it was lifted or placed.
5	00:00:10.22	00:00:10.69	0.47	Cup Moving	Rule-based	The tracked cup changed position during this interval. This does not establish whether it was lifted or placed.
6	00:00:11.34	00:00:11.92	0.58	Cup Moving	Rule-based	The tracked cup changed position during this interval. This does not establish whether it was lifted or placed.
7	00:00:13.52	00:00:14.51	0.98	Cup Moving	Rule-based	The tracked cup changed position during this interval. This does not establish whether it was lifted or placed.

2. Summary

• A total of 7 event(s) were detected in the video.

• 7 event(s): cup moving.

- Events are estimated from tracked position changes, not from a trained machine-learning classifier.
- This prototype measures visible position changes; it cannot verify picking up, putting down, or contact with the table.
